

## Driver Awareness Leads to Safe Driving

Auto accidents have accounted for approximately 24% of the claims reported in Markel's Child Care program. Approximately 82% of those accidents were the fault of the insured driver. The most common causes of accidents were failure to yield, sideswipes, backing up into other vehicle, losing control of the vehicle, hitting a parked car, and colliding at an intersection.

Many of those accidents could have been avoided. To help you educate your drivers, Markel has teamed with I Drive Safely™, a nationally recognized online driving safety organization. We offer our customers three driver education courses, including a passenger van driver education course, at 50% off the regular price. You can access this program at [www.childcareinsurance.com](http://www.childcareinsurance.com). Use it to support your driver training efforts.
